

A/B Testing Framework

Test, Measure & Scale — Ads · Landing Pages · Email Campaigns

A/B testing removes guesswork from marketing decisions. Use this framework to design valid tests, reach statistical confidence before declaring a winner, and scale what works. One variable per test — always.

THE GOLDEN RULES OF A/B TESTING

TEST PLAN NING TEMP LATE

Q1. What are we testing?

Describe the specific element: headline copy, CTA button colour, subject line, hero image, etc.

Q2. What is our hypothesis?

Format:
"We

believe that changing [X] to [Y] will result in [Z] because [REASON]."

Q3.
What is the primary success metric?

CTR, conversion rate, open rate, revenue per visitor — pick one.

Q4.
What sample size do we need?

Use a significance calculator. Minimum: 1,000 impressions or 100 conversions per variant.

Q5.
What is our test duration?

Minimum 7 days to capture

weekly
patterns.
Maximum
30 days
before
external
factors
corrupt
data.

Q6.
**Who is
in
charge
of
running
and
reading
this
test?**

AD CREATIVE AI/ B TEST MATRIX

Test elements in this priority order — highest potential impact first:

1. Hook / Opening Line

The first 3 seconds of a video or the opening line of a static ad. Highest impact element.

2. Headline

The large text in feed ads. Benefit-led vs. curiosity vs. social

proof vs.
urgency.

3. Visual Form at

Static
image
vs. video
vs.
carousel.
Test
format
before
creative
within a
format.

4. Offer Framin g

Same
offer,
different p
resentation:
"Save
\$200" vs.
"Get it for
\$800" vs.
"Free for
30 days".

5. CTA

Cop y

"Book
a Call"
vs. "Get
My Free
Quote"
vs. "See
How It
Works".

6. Aud ien ce Tar
