

GA4 Event Tracking Checklist

Conversion Setup Guide — The Events Every Business Website Needs

Most GA4 installs track pageviews and nothing else. Without conversion events you cannot attribute revenue, optimize paid campaigns on real outcomes, or know which channels generate leads. Run this checklist on any GA4 property to bring it up to standard.

EVEN

T 1 —
FORM
SUB
MISSIONS

Every contact, lead, booking, and newsletter for firms and an event on successful submission

Use the Google-recommended event name "generate_lead" for automatic Google Ads integration.

Event capture forms type

and page URL
as parameters

Event marked as a key event (conversion) in GA 4 admin

Thank-you page views tracked as a backup conversion signal

Verify
events
appear
in
standard
reports.
If they
show in D
ebugView
but not
reports,

the GTM trigger has a configuration issue.

5. Import conversions to Google Ads

Map key events to Google Ads conversions so campaigns optimise on real outcomes.
