Churn Reduction Playbook

Retention Diagnostics

Retention beats acquisition on every unit economic. This playbook covers measuring churn honestly, predicting it early, and intervening effectively.

What's inside

- Churn measurement done correctly
- Early warning signal identification
- Save-offer decision framework
- Exit interview question set
- Win-back sequence templates

Measure Honestly

- 01 Separate voluntary from involuntary churn
- 02 Report logo churn and revenue churn separately
- 03 Cohort by start month, never blended
- 04 Track time-to-churn, not just the rate

Predict

- 01 Identify the usage behaviour that predicts retention
- 02 Watch for declining engagement over three periods
- 03 Flag accounts where the champion has left
- 04 Support ticket sentiment is an early signal

Intervene

- 01 Reach out on the signal, not after the cancellation
- 02 Lead with diagnosis, not a discount
- 03 Reserve save offers for accounts worth saving
- 04 Fix the root cause for the next cohort

Learn

- 01 Interview every churned account you can reach
- 02 Ask what they switched to and why
- 03 Categorise reasons and track the distribution
- 04 Feed the top reason into the product roadmap
