

Customer Research AI Prompt Pack

28 Prompts

AI is genuinely good at finding patterns across qualitative data. These prompts keep it analysing your evidence rather than generating plausible fiction.

What's inside

- 28 prompts for qualitative synthesis
- Review mining and theme extraction
- Jobs-to-be-done formulation
- Interview guide generation
- Anti-hallucination constraints

Synthesis

- 01 Extract recurring themes from pasted interview transcripts
- 02 Cluster support tickets by underlying root cause
- 03 Identify the language customers use for their problem
- 04 Surface contradictions between segments

Review Mining

- 01 Extract the top purchase triggers from review text
- 02 Identify the most common pre-purchase hesitation
- 03 Find the features praised most and least often
- 04 Compare your review themes against a competitor's

Formulation

- 01 Draft jobs-to-be-done statements from evidence supplied
- 02 Build a persona strictly from provided data
- 03 Write a positioning statement citing supporting quotes
- 04 Generate hypotheses ranked by supporting evidence

Constraints

- 01 Instruct: use only the supplied text, invent nothing
- 02 Require a supporting quote for every claimed theme
- 03 Ask it to state where evidence is thin
- 04 Verify a sample of outputs against the source data
