

E-Commerce Product Page Checklist

38-Point Conversion Audit

Product pages fail in predictable ways: weak imagery, buried trust signals, unclear shipping, and friction at the add-to-cart moment. Audit yours against this list.

What's inside

- Image count, angles, and zoom requirements
- Above-the-fold trust and urgency elements
- Shipping and returns clarity
- Review presentation and social proof
- Cross-sell and bundle placement

Imagery

- 01 Minimum six images including scale and in-use context
- 02 Zoom on hover or tap for texture and detail
- 03 At least one short video or 360 view
- 04 Consistent background and lighting across the catalogue

Above the Fold

- 01 Price, availability, and primary CTA visible without scrolling
- 02 Star rating and review count near the title
- 03 Shipping cost and delivery estimate stated upfront
- 04 Variant selection is obvious and never hidden in a dropdown

Trust & Objection Handling

- 01 Returns policy summarised in one line near the CTA
- 02 Payment and security badges close to checkout actions
- 03 Answer the top three pre-purchase questions on the page
- 04 Show real customer photos alongside written reviews

Revenue Expansion

- 01 Recommend complements, not competing alternatives
- 02 Bundle offers with the saving stated in currency
- 03 Back-in-stock capture for out-of-stock variants
- 04 Sticky add-to-cart bar on mobile scroll
