

Social Keyword & Hashtag Workbook

Search-First Social Framework

Hashtag spam stopped working years ago. What works is keyword-optimised captions, on-screen text, and spoken words — because that is what social search indexes.

What's inside

- Platform-by-platform search behaviour
- Keyword placement priority order
- Hashtag tiering by volume
- Competitor discovery audit
- Tracking template for term performance

Where Social Search Looks

- 01 Spoken words in video are transcribed and indexed
- 02 On-screen text carries significant weight
- 03 The first line of the caption matters most
- 04 Profile bio and name field are searchable

Keyword Placement Order

- 01 Say the target term aloud in the first five seconds
- 02 Put it in on-screen text in the opening frame
- 03 Lead the caption with it naturally
- 04 Use it in the file name and alt text where supported

Hashtag Tiering

- 01 Three broad tags for category context
- 02 Four mid-volume tags matching the specific topic
- 03 Three niche tags where you can realistically rank
- 04 Retire tags that deliver no impressions after 30 days

Measurement

- 01 Track impressions from search separately from feed
- 02 Log which terms drive profile visits
- 03 Review quarterly and prune underperformers
- 04 Watch competitor captions for emerging terms

Want us to run this for you?

Squad Tech Solution is a full-service digital marketing agency. We design your homepage concept free — you see the work before you pay.
