

BRANDING

Rebrand Rollout Checklist

74-Point Launch Plan

Rebrands leak. Old logos survive in email signatures, invoice templates, and app store listings for years. This checklist catches them before launch day.

What's inside

- Complete asset inventory by department
- Sequencing to avoid mixed-brand exposure
- Internal comms and training plan
- SEO and redirect considerations
- Post-launch audit sweep

Inventory

- 01 Audit every customer-facing surface across all channels
- 02 Include invoices, contracts, and email signatures
- 03 Catalogue app store, marketplace, and directory listings
- 04 List physical assets: signage, vehicles, print, packaging

Sequencing

- 01 Update owned digital properties simultaneously at launch
- 02 Brief partners and resellers before the public announcement
- 03 Schedule physical asset replacement in waves
- 04 Keep a documented cut-over date for every channel

Internal Readiness

- 01 Train customer-facing teams on the new positioning
- 02 Distribute the brand book and templates before launch
- 03 Prepare an FAQ for the questions customers will ask
- 04 Nominate an owner for brand consistency post-launch

Search & Technical

- 01 Redirect the old domain properly if the name changed
- 02 Update structured data, metadata, and social profiles
- 03 Refresh Google Business Profile and citations
- 04 Monitor branded search volume for both names
