

SEO Reporting Dashboard Template

Client-Ready Monthly Report

Reports fail when they show effort instead of outcome. This structure leads with business impact and keeps activity in the appendix where it belongs.

What's inside

- Metric hierarchy: revenue first
- Commentary prompts for each section
- Rank tracking that avoids cherry-picking
- Attribution caveats stated plainly
- Next-month priorities format

Lead With Outcomes

- 01 Organic conversions and assisted revenue at the top
- 02 Qualified leads, not raw traffic, as the headline metric
- 03 Month-over-month and year-over-year side by side
- 04 One sentence explaining what changed and why

Supporting Metrics

- 01 Non-brand organic sessions separated from brand
- 02 Ranking movement for a fixed keyword set, never a rotating one
- 03 Indexed page count and coverage errors
- 04 Core Web Vitals trend

Honest Commentary

- 01 State what did not work as clearly as what did
- 02 Flag external factors: seasonality, algorithm updates
- 03 Never attribute all conversions to one channel
- 04 Include the confidence level of any forecast

Forward Plan

- 01 Three priorities for next month, ranked
- 02 What you need from the client, with dates
- 03 Risks that could affect delivery
- 04 Anything deprioritised and why
