

Technical SEO Audit Checklist

58-Point Crawl Audit

Content cannot rank on a site that cannot be crawled or indexed correctly. Work through this audit before investing in content or links.

What's inside

- Indexation and coverage diagnosis
- Canonical and duplicate resolution
- Structured data validation
- Internal linking depth analysis
- Log file crawl budget review

Indexation

- 01 Compare submitted vs indexed counts in Search Console
- 02 Find pages blocked by robots.txt that should be indexed
- 03 Identify thin or duplicate pages diluting crawl budget
- 04 Verify noindex is absent from pages you want ranked

Canonicals & Duplicates

- 01 Every page self-canonicals unless deliberately consolidated
- 02 Parameter URLs resolve to a single canonical version
- 03 Enforce one hostname and one protocol
- 04 Paginated series handled consistently

Structured Data

- 01 Validate every schema type against the Rich Results Test
- 02 Organization and WebSite schema on the domain root
- 03 BreadcrumbList on all nested pages
- 04 Never mark up content invisible to users

Architecture

- 01 Every important page within three clicks of the homepage
- 02 Internal links use descriptive anchor text
- 03 Orphan pages identified and linked or removed
- 04 XML sitemap contains only indexable 200-status URLs

Want us to run this for you?

Squad Tech Solution is a full-service digital marketing agency. We design your homepage concept free — you see the work before you pay.
